Atrium Medical Center
Premier Health Partners

Atrium's Dialysis Center offers people living with kidney failure a treatment option close to home. Located a few miles from Atrium Medical Center, this freestanding outpatient center serves patients with end-stage renal disease, chronic renal failure and chronic kidney disease.

Modern Facility

Patient comfort and safety is the focus of the center. In a bright, friendly environment, the center offers:

- Sixteen private, curtained patient-care stations that include a television and recliner in each station for ultimate relaxation during treatments
- Specialized monitoring equipment and modern hemodialysis machines with safer, cleaner, single-use filters
- On-site Education Resource Center with Internet access focusing on kidney failure, dialysis treatment and related topics
- Personalized nutrition counseling based on the National Kidney Foundation's guidelines
- On-site social worker to help patients and families with medical, financial and emotional challenges

Atrium Medical Center also features a four-bed unit on campus to offer privacy and comfort for inpatients needing dialysis during their stay.

Quality Services

The Dialysis Center's association with Atrium Medical Center allows the center to provide a range of convenient, quality services that are held to hospital standards. Standard laboratory tests are usually returned the same day, and critical tests are delivered even quicker.
