Modern Facilities

Atrium's integrated surgical area on the second floor features:

- Robotic-assisted surgery using the da Vinci® Si HD system
- Seven operating rooms, including two extra-large suites for trauma and open-heart surgery
- Advanced Pain Treatment and Evaluation Center
- Procedure rooms for cystoscopy, bronchoscopy and endoscopy
- Private pre- and post-procedure rooms with space for family members to visit
- 12-bed Post Anesthesia Care Unit, with one isolation room and one room to accommodate parents accompanying a pediatric patient

Atrium's surgical suites include ceiling-mounted booms for equipment, lights and monitors, and networked computers for access to digitally stored test results.

Pain Management Services

Atrium has a board-certified interventional pain management physician who treats back and neck pain from herniated discs, degenerative discs, joint degeneration and previous back or neck surgeries that failed. The center is open four days a week to perform a large variety of pain management services.
