

# Behavioral Health at Atrium

The Behavioral Health Pavilion at Atrium provides expert behavioral health services to residents of Southwest Ohio. Our 30-bed Pavilion offers inpatient adult services and specializes in care for older adults.

Attached to the Medical Center, the Pavilion includes its own parking and separate entrance.

Designed by behavioral health experts, the Behavioral Health Pavilion provides a safe and supportive setting for focused individual, group and family therapies. The facility includes separate units for inpatients and outpatients. This allows our staff to develop a program specific to the unique needs of each patient.

## Dedicated Programming

### Adult Inpatient Care

Our staff provides 24-hour supervision in a secure, healing environment while focusing on enhancing each person's dignity, self-reliance and quality of life. Typical treatments include group and individual therapy, family sessions and management of medications.

### Older Adult Inpatient Program

This program serves older adults facing behavioral health challenges later in life. It offers 24-hour supervision in a therapeutic environment to patients aged 65 and over. The program offers:

- Memory impairment assessment
- Medication management
- Psychological testing
- Individual, group or family therapies
- Physical, occupational, speech or recreational therapies
- Discharge planning
