

# Laboratory Services at Atrium

Atrium Medical Center's laboratory serves both inpatient and outpatient clients, physician offices, extended care facilities and home health agencies. The one-stop Diagnostics Center at Atrium's main campus – in conjunction with multiple community locations – makes outpatient access convenient for patients.

The Atrium lab is committed to meeting the ever-changing health care needs of our community through clinical excellence, process improvement, continuing education and the implementation of new technologies.

## Local Lab, Local Experts

Our highly trained staff is board certified by ASCP (American Society of Clinical Pathologists) and includes pathologists, medical laboratory scientists, medical laboratory technicians, cytotechnologists, histotechnologists, laboratory service associates and support personnel.

Our technically certified personnel staff the laboratory 24 hours a day, seven days a week. Pathologists are available for consultation at the lab during regular business hours and are on call after hours.

As a hospital-based laboratory, our professional staff provides experience in

disease diagnosis and understands the relationship between lab results, treatment options and monitoring disease progress.

We perform 95 percent of our laboratory tests in-house and provide excellent turn-around time due to our automated robotic chemistry and hematology analyzers. Bar code technology reduces clerical errors and provides accurate patient identification.

Esoteric testing is performed primarily by our reference laboratory, world-renowned Mayo Clinic. Reference laboratory selection is determined by the laboratory medical director and approved by the Medical Staff Executive Committee.

Laboratory results are available according to physician preference including: auto fax, physician mailbox in the Atrium lounge, mail, courier, EPIC and Healthbridge.
