

Patient Name \_\_\_\_\_ DOB \_\_\_\_\_

Procedure CT Lung Screening Patient Phone number \_\_\_\_\_

Physician Name \_\_\_\_\_

Physician Signature \_\_\_\_\_ Date \_\_\_\_\_

**All candidates for CT lung screening should be asymptomatic, have no known metastatic disease, and should not have a diagnosis of lung cancer within the past 5 years.**

Patients with metallic implants or devices in the chest or back, such as pacemakers or Harrington fixation rods, are not eligible for lung cancer screening due to potential imaging artifacts.

Pack-Years \_\_\_\_\_ (Pack years = number of packs per day times years of smoking)

Smoking Status  Current  Former, quit \_\_\_\_\_ years ago

### NCCN High-Risk Categories for Qualifying for CT Lung Screening

#### High Risk (category 1) – must meet all three criteria

- 55-74 years old
- Currently a smoker or quit within the past 15 years
