

Coding for Hospital-Based Healthcare Professionals (ICD-10-CM & PCS)

A two day workshop

This workshop is designed for the hospital-based healthcare professional who is knowledgeable and experienced with ICD-9-CM and needs to understand the basic structure, guidelines and coding protocols of ICD-10-CM and ICD-10-PCS. The federal government has mandated that ICD-10-CM will replace ICD-9-CM for diagnosis coding in all types of healthcare services on October 1, 2014, and it is significantly different in structure and coding protocols. ICD-10-PCS will replace ICD-9-CM for inpatient procedural coding and it has a radically different structure and approach than its predecessor. This workshop will devote the first day to ICD-10-CM and the second day to ICD-10-PCS.

Workshop objectives are as follows:

ICD-10-CM—Day 1

- Introduction to the structure of ICD-10-CM and its significant differences from ICD-9-CM
- Format of ICD-10-CM codes
- Coding conventions and guidelines
- ICD-10-CM coding processes and chapter-specific instructions
- Practice coding ICD-10-CM using acute care Scenarios

ICD-10-PCS—Day 2

- Introduction to the unique structure of ICD-10-PCS

- Structure of a PCS code and explanation of its component fields
- Definitions and values of the characters
- Coding conventions and guidelines
- Practice coding ICD-10-PCS using acute care Scenarios

Hospital professionals who might benefit from this workshop include, but are not limited to, those working in:

- Information technology
- Clinical documentation
- Quality improvement, risk management and utilization
- Administration
- Revenue cycle management
- Corporate compliance
- Decision support
- Health information management

Experienced professional coders may be interested in this workshop as an introduction to ICD-10, but it is not designed to be a mastery level coder training program.

This workshop assumes some experience and knowledge of ICD-9-CM coding in acute care and is not appropriate for those with no prior experience or knowledge of coding.

content tailored to meet your strategic goals, Sinclair takes pride in tailoring solutions to ensure your organization shares a common vision, based on your input.

Put the power of customized training to work for your organization.
